

AMMAAR REHMAN

Ellicott City, Maryland | (301) 768-5445 | ammaarrehmanf@gmail.com | [linkedin.com/in/ammaarrehman](https://www.linkedin.com/in/ammaarrehman) | github.com/ammaarrehman

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (S3, CloudFront, Route 53, IAM, EC2), Terraform, Docker, infrastructure-as-code

Systems & Networking: Linux, DNS/DNSSEC, Unbound, AdGuard Home, Tailscale, networking fundamentals

Monitoring & Observability: Prometheus, Grafana, Uptime Kuma, node-exporter, cAdvisor

Programming & Tools: Python, JavaScript, HTML/CSS, Java (basics), Git/GitHub, VS Code

AI & Automation: Claude & Anthropic API, AWS Kiro, AI-assisted development, prompt design, evaluating and refining AI outputs, technical documentation

SELF DIRECTED PROJECTS

AWS Static Website Deployment - Terraform, AWS S3, CloudFront, Route 53, IAM

- Provisioned cloud infrastructure as code with Terraform end to end (hosting, CDN, DNS, access controls) and documented a repeatable deploy/teardown workflow.
- Used AI-assisted tooling to debug configuration errors and accelerate learning of unfamiliar AWS services.

Claude Intake Triage Assistant - Claude API, Google Apps Script, Google Forms, Google Sheets, Python

- Built a Claude-powered workflow that turns free-text community help requests into structured, reviewable records with category, urgency, summary, next steps, and human-review flags.
- Connected Google Forms, Sheets, and the Claude API to triage submissions automatically while preserving staff oversight for sensitive or ambiguous cases.
- Wrote a 15-case Python eval harness; restructuring the prompt to capture primary plus secondary needs raised multi-need coverage from 0% to 90% and classification accuracy to 100% across the 15-case test set.
- Documented the system with a README, staff runbook, safety notes, and demo to support non-technical handoff.

Self-Hosted Homelab - Raspberry Pi 5 (x2), Linux, Docker, keepalived, AdGuard Home, Unbound, Prometheus/Grafana

- Built high-availability DNS across two Raspberry Pi 5 nodes using keepalived and a VRRP floating IP, with a service-level health check that moves the IP to the backup node within seconds when the primary's DNS stops answering; tested automatic failover and failback in both directions.
- Ran AdGuard Home filtering in front of a recursive Unbound resolver with DNSSEC on each node, and automated configuration replication between nodes with AdGuardHome-sync so the backup mirrors the primary.
- Built a containerized observability stack from scratch (Prometheus, Grafana, node-exporter, cAdvisor) monitoring host and container health across the lab's Docker services.
- Added Tailscale mesh VPN for remote access, and documented every project on GitHub with per-project READMEs and an architecture overview that separates live work from planned.

PROFESSIONAL EXPERIENCE

NextGen Consulting Inc., Washington DC-Baltimore Area

Cloud & AI Operations Intern

May 2025 - Present

- Use AI-assisted tools (Claude, AWS Kiro) daily to investigate errors, summarize issues, and improve internal support documentation other staff reuse.
- Run configuration checks, service testing, and issue triage on active cloud projects.
- Translate technical problems into clear next steps for non-technical users and stakeholders.

Information Technology Operations Intern

June 2024 - May 2025

- Resolved 200+ user issues spanning account configuration, access, and mobile app troubleshooting.
- Tested app functionality, documented bugs, and built support documentation that reduced repeat-issue resolution time.

Howard Community College Campus Store / Slingshot, Columbia, MD

Campus Operations Associate

Aug 2024 - Present

- Operate order, fulfillment, and inventory systems to serve students, faculty, staff, and departments in a fast-paced, high-volume environment.
- Troubleshoot order, delivery, and account issues, and identify recurring workflow problems to improve consistency during peak periods.

LEADERSHIP & HONORS

Maryland House of Delegates - Volunteer Staff | **FBLA National Qualifier** - Competed at the national level

EDUCATION

University of Maryland, Robert H. Smith School of Business, College Park, MD

2028

B.S., Information Systems | Guaranteed transfer admission; Smith School direct-admit criteria met

Howard Community College, Columbia, MD

2026

A.A., General Studies | GPA: 3.65 | Dean's List

Relevant Coursework: Accounting I & II, Economics (Macro & Micro), Business Calculus, Statistics, Marketing, Intro to Business, Computer Concepts, Python

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** - Amazon Web Services (CLF-C02) June 2026
- **Anthropic AI Fluency & Claude Developer Training** - Claude Platform, API, and AI Fluency tracks June 2026
